

## About us

We love motorsports in any form. No matter if it's on 2 wheels or 4, on a race track or off road, in the sky or on the water or in any other form. We love motorsports.

In September 2015 we saw a wood-cut racetrack for the first time and were thrilled with the idea. Pretty soon we knew we wanted to offer something similar as well.

After a few months our concept was ready and the contracts were signed. We are official license partners of the Hockenheimring and Nürburgring. We cooperate with the Lausitzring, the Motorsport Arena Oschersleben, the Driving Center in Groß Dölln, the Bilster Berg and many other racetracks.

Every day new partners join us and our mission is clear: We want that in every garage, in every living room, in every office and conference room, in every workshop and at every professional race team and in other places a racetrack decorates the wall.

Our racetracks are made of plywood and come with a film faced surface and are available in black, blue or red. We offer our racetracks in 3 sizes – 23 cm (9 inch), 46 cm (18 inch) and 92 cm (36 inch) width.

Our customers can choose between more than 700 racetracks from all over the world.

If there is a racetrack missing in our range, we only need a graphic and can produce it within a few hours.

Together with you we're looking forward to the things to come.

Let's Race!

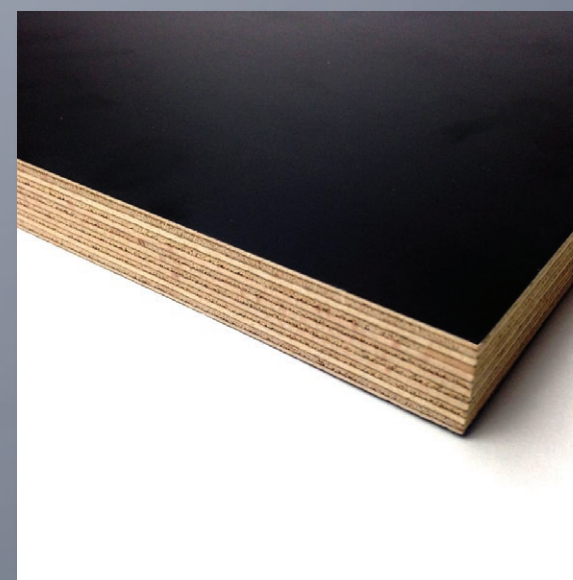

Your Racetrackart Team

## Materials

The most important raw material for plywood is the regrowing natural resource timber. The main raw materials for the production of plywood are the Finnish birch (*Betula pendula*, hardwood) and the spruce (*Picea abies*, softwood).

Our race tracks are made of Finnish birch. We only use premium plywood which is coated with phenol resin.

The plywood we get from Finland is FFCS (The Finnish Forest Certification System) certified. This national forest certification system FFCS reliably proves that the forests are cultivated according to the principles of sustainable development.

The finish FFCS forest certification system has the approval of the PEFC system (The Pan-European Forest Certification). The PEFC environment label you can see on our timber products or their packaging guarantees that the wooden material comes from forests which have the FFCS system certification. This requires the monitoring of the whole process of acquiring the timber and manufacturing.

## Licenses

In order to line up our enterprise as widespread as possible we talked to many racetracks and explained our plans. Almost without exception we received encouragement and were even able to acquire licenses for the two major racetracks in our portfolio.

### Nürburgring

### Hockenheimring

This makes us the only company in Europe that is officially permitted to produce layouts of these racetracks and commercially distribute them. For you as a retailer this is made clear with the sticker "officially licensed" that is on every product associated with these two racetracks.

The license also guarantees premium quality which is checked by the licensor. In addition, it fuels our aspiration to live up to the standards of these two high value brands.

If nothing else, an officially licensed product is always a great sales argument which guarantees a sale for you.

## Co-operations

Because our product is new on the European market we aim to develop in as many different directions as possible. Every day we open up new sales potential and talk with retailers about ways to market our wooden race-tracks.

Thanks to our in-house production process we can fulfill nearly every customer wish, be it an individual engraving or a framed race track with carbon fibre surface.

No matter if you are organizing mountain races, own a go-cart track or are a travelling retailer with your own booth, together with you we'd like to develop a way to increase your sales with our racetracks.

## Retailer information

You know passionate motorsports fans?

Are you a:

trackday organizer, track taxi provider, freelance instructor, professional race team, motorsports club, retailer on motorsports events, racing service provider or owner of a webshop with motor sports articles or or or.

We have the right product for you.

Our plywood racetracks are available in 3 sizes and are affordable for everyone:

23 cm (9 inch) width, track width 9 mm (0.35 inch) with 9 mm (0.35 inch) wood thickness, RRP 49 EURO

46 cm (18 inch) width, track width 1,3 cm (0.51 inch) with 21 mm (0.83 inch) wood thickness, RRP 99 EURO

92 cm (36 inch) width, track width 2,5 cm (0.98 inch) with 35 mm (1.38 inch) wood thickness, RRP 199 EURO

Shortly we will also offer special editions, for example with a surface made of real carbon and many more products.

The racetracks are surely a gain for your choice of products, no matter where you sell them!

Don't hesitate and contact us today.  
Call 0049/40/36164963  
or send an e-mail to [info@racetrackart.de](mailto:info@racetrackart.de)

After we received a verification of your commercial activity, we'll send you our attractive trade prices and you can place your first order with us.

For the presentation of our products you can get flyers and rollup banners for the on-site sale. In agreement with us you can use our pictures and descriptions so that you can start selling right away.

We're looking forward to hearing from you today.
